Run fastlane and point to the PrepAtHome_entitlements file  <pre>fastlane sigh resign ../../ePrepHome_PROD.ipa -e ../../PrepAtHome_entitlements.plist --signing_identity "iPhone Distribution: Emory University" -p ../../Prep_At_Home.mobileprovision</pre>

Remember that fastlane is necessary because iResign won't sign the embedded frameworks  See <a href="https://coderwall.com/p/dgdgeq/how-to-re-sign-ios-builds">https://coderwall.com/p/dgdgeq/how-to-re-sign-ios-builds</a> for a great tutorial on how to resign code.

Please correct the following issues, then upload again.</p> <p><b>Invalid Swift Support</b> - The SwiftSupport folder is missing. Rebuild your app using the current public (GM) version of Xcode and resubmit it.</p> <p>Though you are not required to fix the following issues, we wanted to make you aware of them:</p> <p><b>Missing App Store Icon</b> - iOS Apps must include a 1024x1024px App Store Icon in PNG format.
