Emory Application Owner: Dr. Robert Bednarczyk (robert.a.bednarczyk@emory.edu)

Emory Application Technical Contact: Ines Gonzales Casanova Soberon (IGONZA2)

Application Support Model: Vendor/Contractor

Application Administration Model:

Application Description (Version 1): There is a lot of information available about vaccines and vaccination, and there are many mobile apps related to vaccines. However, there are few apps designed by trusted academic experts that can be rapidly updated for both routine use and emergency situations, such as outbreaks.

ReadyVax is a new app that contains up-to-date information about vaccines and vaccination. With regularly updated data on vaccine recommendations and vaccine safety, and the ability to notify users in real-time of important vaccine information, ReadyVax is your trusted source for evidence-based information about vaccines. We have designed ReadyVax to be used by both health care providers and health care users, and users can customize the presentation of data, with a single click, to suit their information needs.

Every time you start the app, the latest information is downloaded into your copy. This information will be accessible even if you lose network connectivity. The ReadyVax team constantly monitors vaccine recommendations to make sure the most up-to-date information is there for you.

Current Issues

Issue Log

-There were difficulties with ReadyVax (both app and webpage) accessing and loading while connected to the Emory network. A ticket with the network team appears to have resolved the issue.
