

Internal Android App Distribution Request Template

Background

This request template is intended to be used to request app distribution on the Emory internal distribution site. To use this template, copy it and append "[AppName]" to the template.

ID	Required Information	Response
1	Application Name [AppName]	
2	Application short description up to 100 characters	
3	Application long description up to 1000. NOTE: if a long description is not provided, the short description will be used instead.	
4	Attach the APK file to this page with its final name [AppName].apk	Provide a link here to the attached file.
5	Attach a large image for display on the distribution site with the file name LargeImage.png.	Provide a link here to the attached file.
6	Attach a small image for display on the distribution site with the file name SmallImage.png.	Provide a link here to the attached file.
7	<p>Provide a list of all people who should be able to download your application: first name, last name, e-mail address.</p> <p>These people will be sent an invitation to join the app catalog. Once they've completed their registration, they'll be able to see and download apps based on which groups they belong to.</p>	Provide a link here to the attached file.
8	<p>Suggest a group name that the users of this application might be associated too.</p> <p>For example, the Surgery department might want to associate their apps to a "Sugery" group.</p> <p>This ensures the application is targeted toward the appropriate group of people. Using groups makes this maintenance simpler. By default, any app added to the catalog will be available to all catalog users. All we need is a suggestion. This may not be the final group name that is used but it will be a starting point and will provide information to the administrators that will help organize things efficiently.</p>	
9	Support Contact. Need support email when request for submission is made. Need support phone number when the App in production status
