

Internal Mac OS X App Distribution Request Template

Background

This template is intended to be used to request app signing and distribution for internal, Emory developed, Mac OS X applications. **To use this template, copy it and append ": [AppName]" to the new copy.**

ID	Required Information	Response
1	Application Name [AppName]	
2	Application Version	
3	Application Type (Mac OS X etc.)	
4	Application short description up to 100 characters	
5	Application long description up to 1000. NOTE: if a long description is not provided, the short description will be used instead.	
6	Attach the .dmg, .app, .zip etc. file to this page with its final name [AppName].dmg. This app will be re-signed with Emory's Apple Enterprise Developer credentials for internal distribution. Alternatively, you can upload the binary artifacts to Box and include the link to those artifacts here.	
7	Support Contact. Need support email when request for submission is made. Need support phone number when in production status
