

# How to Deploy an OpenEAI ESB Axis2 Facade

Use emory-awsaccount-webservice as an example

## Here is what's generated

See [OpenEAI ESB Service, Web Service, and Project Generation \(OpenEAI-Servicegen\)](#)

## Steps to deployment to dev using AwsAccountService as an example:

- 0) rename webserviceAppConfig to AwsAccountService.xml and move it to emoryoit/deployment/esb/dev/Deployments in subversion and commit.
- 1) Unjar axis2.war
- 2) add aws-moa.jar and emory-awsaccount-webservice-1.0-wsdl-classes to WEB-INF/lib directory
- 3) add emory-awsaccount-webservice-1.0-dev.aar to WEB-INF/services directory
- 4) re-jar back into axis2.war and commit it to subversion.
