- Internal-facing Services - Reviewed and Approved (0)
- Vendor-provided Services Under Review for Consumption by Emory (0)
- Vendor-provided Services - Reviewed and Approved (0)
- Unreviewed, Unapproved Services (43)
- Retired Services (0)

Total Services Tracked (50)

This is the total number of services presently tracked by the Emory SOA Governance Process and includes both internal-facing and public-facing services Emory publishes as well as vendor-provided services and events that Emory consumes. For requests to access existing services see the [service access request dashboard](#).

In Concept, Cost Estimation, Design, Development, or Enhancement (7)

Note: Not all services in design, cost estimation, and development are known by Emory IT. Some services only come to the attention of central IT as part of the review process.

1. ServiceNow Service (enhancing to add support for request and incident objects)
2. Identity Management Service
3. AWS Account Service
4. Elastic IP Service
5. CIDR Service
6. AT&T NetBond Service
7. PeopleSoft Service FS (enhancing to support queries for Speedtype validation)

Under Review for External Access (0)

None at this time

External-facing Services - Reviewed and Approved (0)

Note: All external-facing Emory services are also internally-facing at various points in their lifecycle. These listing of external-facing and internal-facing services are not distinct, but they may be listed in both categories if the service has both approved external and approved internal clients.
