

Apple App Store Submission - SMARTDM2

When you are ready to submit to the App Store there are artifacts that must accompany the submission to Apple. The review process itself takes a variable amount of time and can range from anywhere from two to four weeks for first time app submissions. Please be sure to account for this time period in your project plan.

Note that you can add an attachment by using Add=>Attachment or by just dragging a file to the page. Put the image files into folders and zip into a single file works the best. To review the attached files, using Add=>Attachment.

Number	Required Information	Response
1	Attach a signed ipa file that has been packaged and tested so that we can re-sign with the Emory University Certificate.	Add=>Attachment a zipped file
2a	App Name - This is the name as it will appear in the App Store - Required (30 chars max)	SMARTDM2
2b	App Subtitle - Optional (30 chars max)	For outpatient DM2 management
2c	(optional) Promotional text lets you inform your App Store visitors of any current app features without requiring an updated submission. This text will appear above your description on the App Store for customers with devices running iOS 11 or later, and macOS 10.13 or later.	System for Management of Antihyperglycemic Regimens and Transitions in Diabetes Mellitus II.
2d	(required) A description of your app, detailing features and functionality.	<p>The management of outpatient antihyperglycemic regimens for patients with type 2 diabetes is complicated. This app is designed to synthesize treatment pathway guidelines developed by the American Diabetes Association, the American Association of Clinical Endocrinologists / American College of Endocrinology, and the Emory University Diabetes Council. Based on patient-specific factors that you select, a weighted list of medication options is sorted and presented.</p> <p>Designed for use by healthcare professionals. We have no relationship with nor has the app been endorsed by the American Diabetes Association, the American Association of Clinical Endocrinologists or the American College of Endocrinology. Results from the app should not be considered medical advice: individual patient factors not accounted for in the app may influence management decisions; medical evidence and guidelines may change ahead of updates to the app; regardless of best efforts, errors may be present in the app. Consult your doctor before making any changes to your medication regimen.</p>
2e	(required) Include one or more keywords that describe your app. Keywords make App Store search results more accurate. Separate keywords with an English comma, Chinese comma, or a mix of both.	diabetes, medications, type 2, type II, DM2, diabetes mellitus
